

SNAPSHOT

DEPARTMENT OF

INDUSTRIAL AND SYSTEMS ENGINEERING

2022 v1

Students tell us that the most valuable parts of their IE degree are regular opportunities for interactions with alumni,

flexibility in taking elective courses in a chosen focus area, and a hands-on capstone design project with an industry sponsor.

ISyE at UW-Madison boasts world-renowned research leadership in healthcare systems engineering, optimization, human factors

and manufacturing. Our research seeks to address societally important problems by making fundamental advances in engineering to make a difference in our world.

Our alumni are leaders in various industries, including Silicon Valley startups, finance, consumer supply chains, national health systems organizations, and high fashion and beauty. They are proof that a degree from UW-Madison ISyE provides limitless possibilities.

In the last two years, **3 of our faculty members have been named Fellows of IISE and AAAS**, the leading organizations in their fields of study, and our HFES and INFORMS student chapters have achieved gold and cum laude status.

We attract the best students, faculty, and research partners in the world. We're proud to be an important contributor to the UW-Madison mission to improve the quality of life for all.
