TOP THINGS TO KNOW

Learning by doing. Our faculty shape the next generation of problem-solvers and engineering leaders, and we believe the best way for our students to learn engineering is by doing it.

Discovery through teamwork. In our research, we welcome collaboration and believe the greatest discoveries arise when we bring together bright people with diverse backgrounds and experiences.

Impact through leadership. In the spirit of the Wisconsin Idea, we believe that our people, knowledge and advances should benefit people’s lives throughout the world.
