

Exact Sciences Internship Program

We are dedicated to providing science-backed solutions, patient-focused insights, and a human-first approach to cancer.

Internship Program Overview

- Open to undergraduate and graduate students interested in gaining hands-on experience
- Professional development workshops available to build skills beyond the classroom
- Work on real-world projects that align with business needs and personal development
- Network opportunities with leaders, mentors, and fellow interns
- Social events to foster connections and a sense of community
- 12-week paid summer internship program

Why Become an Exact Sciences Intern?

Develop both technical and professional skills **to advance your career.**

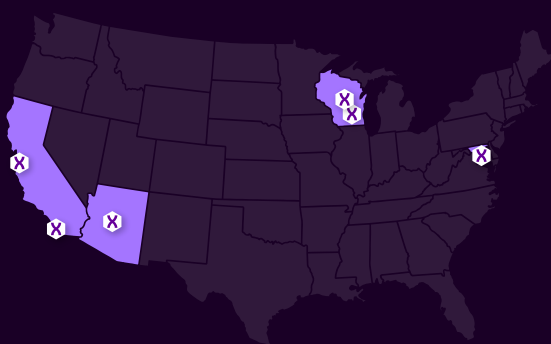

Work at a company with the purpose of **helping eradicate cancer** by preventing it, detecting it earlier, and guiding personalized treatment.

Gain valuable industry experience while contributing to meaningful work.
